

Memorandum

Date: July 13, 1998
To: Ecosystem Roundtable
From: Cindy Darling
Re: Tracking System

Summary

Fiscal and program information is being tracked and reported for all projects being implemented with the available funding sources. This information will be presented on a quarterly basis to the Ecosystem Roundtable, to the Management and Policy teams, to Congress and the Legislature, and to the general public. Each level of reporting will likely include different types of information depending on each group's interest. A revised format for reporting to the Roundtable will be presented along with a briefing on the other reporting formats that are being used.

Roundtable Action

The Roundtable will be asked if the format being used for reporting to them meets their needs.

Background

At the last Roundtable meeting, Pat Rivera presented a draft format. This format has been more thoroughly developed and discussed with Tom Zuckerman and Hari Modi. A revised format will be presented that builds on the previous draft. Presentations will also cover the level of information that will be available in other reporting formats.
